**Wireless ADSL2+ Router 300 Mbps — 11n
Web:Link 39300**

Jensen Web:Link™ 39300 is a Wireless ADSL+ Router with built in ADSL2+ modem providing speeds up to 300 Mbps! This is the perfect solution for wireless networks at home, in the office or at school. Today's users of wireless networks are demanding higher speed, longer range and reliability. Jensen Web:Link™ 39300 provides all this in addition to ensure security in the best way possible.

LongRange Extreme-N

LongRange Extreme-N is a full range of products to build a secure and stable wireless network.

All product are based on 802.11n draft 2.0 and MIMO technology to transfer data simultaneously. With this combination you can cover a wide area with HighSpeed and secured wireless network.

LongRange Extreme-N is also compatible with earlier WiFi standards. This means that our LongRange Extreme-N products works fine with all products based on 802.11b/g.

QoS - Quality of Service

Quality of service provides an efficient way for computers on the network to share the Internet bandwidth with a promised quality of Internet service. With the QoS function, you can limit the maximum bandwidth or give a guaranteed bandwidth for a specific computer, to void said unpleasing result from happening.

WPS via "Push-button"

Wi-Fi Protected Setup (WPS) is the easiest way to build secured connection between wireless network clients and this wireless router.
